

BONE MARROW TRANSPLANT COST IN INDIA

INTRODUCTION

why bone marrow transplant important?

A bone marrow transplant is essential for treating conditions like leukemia, lymphoma, and blood disorders. It replaces damaged marrow with healthy cells, restores immunity, and supports recovery after high-dose treatments, offering hope for long-term remission or a potential cure.

TYPES OF BONE MARROW TRANSPLANTS IN INDIA

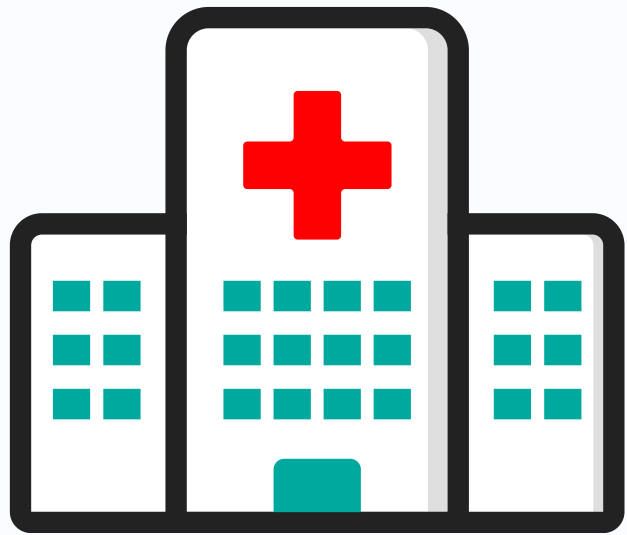

- Autologous Transplant: Uses the patient's own cells.
- Allogeneic Transplant: Uses cells from a donor.
- Umbilical Cord Blood Transplant: Uses stem cells from umbilical cord blood
